DC - 1.4 kg

TECHNICAL SPECIFICATIONS

- 1 Shut-off valve:**
It allows for the equipment to be kept in a safe condition even if pipes are damaged or there is a pressure drop in the system.
- 2 Toothed side panels:**
Their profile allows for the gripped parts to be held.
- 3 Double bottom and blades made of HB400:**
This material guarantees high resistance to deformation of the gripping part.
- 4 Hydraulic system built into the body:**
The system built into the body allows for the pipes to be protected, preventing damage during work.

ACCESSORIES:

Optional teeth:
available ON REQUEST with DC1 teeth.
