

SPECIAL APPLICATIONS

MINI AND MIDI EXCAVATORS, SKID STEER LOADERS,
COMPACT TRACK LOADERS AND MINI TRACK LOADERS

 **EUROCOMACH**

Concrete solutions. Always.

SPECIAL APPLICATIONS

Looking for a customized solution for your most complex challenges? Looking for a machine that can meet your every need and application, even the most specific ones?

Thanks to our team of experts and Sampierana's decades of engineering know-how, we will create your Special Machine, custom-built right down to the track...and beyond!

HOW DOES IT WORK?

- Your applications requirements and details are gathered
- Our tech dept checks feasibility
- You receive a feasibility feedback and a presentation of the proposed solution
- Validation
- Realization

DEMOLITION MADE COMPACT

135 D Demolition Excavators features tilt cab and highreach view camera to operate demolition attachments at more than 13 m height.

Its retractable undercarriage (2,32-2,92 m) enables easy transport and operations especially in sometime challenging urban spaces, ensuring extraordinary stability during work.

FIRE FIGHTING

Another example of our ability to develop tailor-made customer-centric solutions is the TAF35, a remotecontrolled fire fighting turbine. A very effective solution for big fires, due to the high extinguishing capability of the aerosol turbine. The remote control enables access to complex building structures.

TRIVELLATION PLATFORMS AND MUCH MORE

We offer customizable platforms (ESPs) developed on 10 models from 2 to 10 tons with fixed undercarriage or variable undercarriage for the most heterogeneous types of machines special machines such as telescopic cranes, "tunneling solutions," drilling (both pile driving machines and micropiles), distributed worldwide thanks to the work of our partners.

CUSTOMIZED SOLUTIONS

Beyond the above solutions our Special Application Team knows how to customize machines around specific needs like military requirements and many more...
